

InDesign has a very useful feature for imposing your spreads when printing a multipage document. I recommend that you export your document as a PDF when you impose it. This function will only work if you have installed a PostScript printer driver. The following handout is a step by step guide to installing the driver, setting up a false printer and producing an imposed multipage PDF document that would be suitable to pass onto a printer.

Stage 1 : Step 1 Download and install Postscript printer driver

1. Go to www.bowerashton.org > Technical Resources > EPICentre > Workshops > InDesign: Booklet
2. Find the **hp_color_laserjet_5550.gz** icon click Download File to download the driver
3. Open a new finder window and navigate to: Macintosh HD > Library > Printers > PPD's > Contents > Resources
4. Drag or copy the HP 5550 PPD into the Resources window from your Downloads folder

3&4

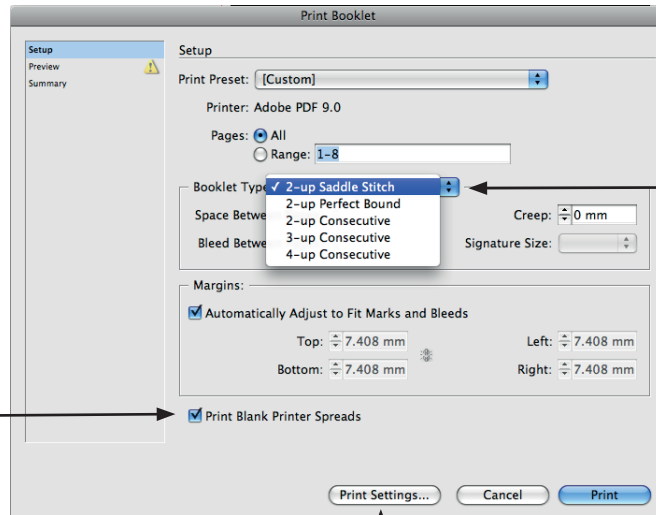

Stage 2 Installing a false printer

1. Open System Preferences > Printers & Scanners
2. Click the + (add printer) button
3. Click the IP icon at the top of the window
4. Address : 000.000.000.001
5. Name: Postscript PDF printer
6. Use: Choose **Select Printer Software** from the menu
7. Type 5550 into the search field in the Printer Software
8. Choose the HP Color LaserJet 5550 v3010.107
9. OK
10. Add
11. Click Continue when you get the **Unable to verify the printer on your network.** error message.
12. Click OK

1 When you have completed designing your document and are ready to print; go to File > Print Booklet.

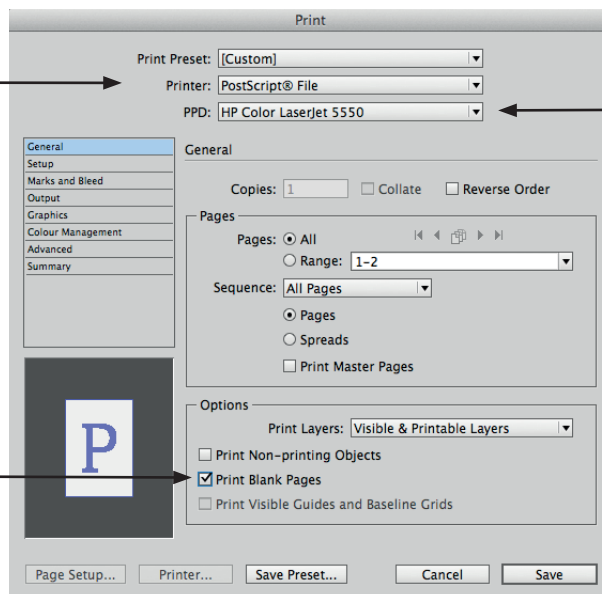

2 Choose your Booklet Type. If you are having your booklet printed and bound by a printer you will need to ask them for a Creep value and a Signature Size if you are having your booklet Perfect Bound

3 Tick Print Blank Printer Spreads

4 Click Print Settings...

5 Set the Printer to PostScript® File

6 Choose: EFI Colorproof XF

7 Tick Print Blank Pages

Choose Setup **8**

Choose your paper size; big enough to fit a spread with bleed and slug **9**

Choose orientation **10**

Set Page Position to Centred **11**

Choose Marks & Bleed **12**

Choose Crop Marks **13**

Best to ask your printer what other marks he might require. If in doubt, make sure Registration Marks is ticked.

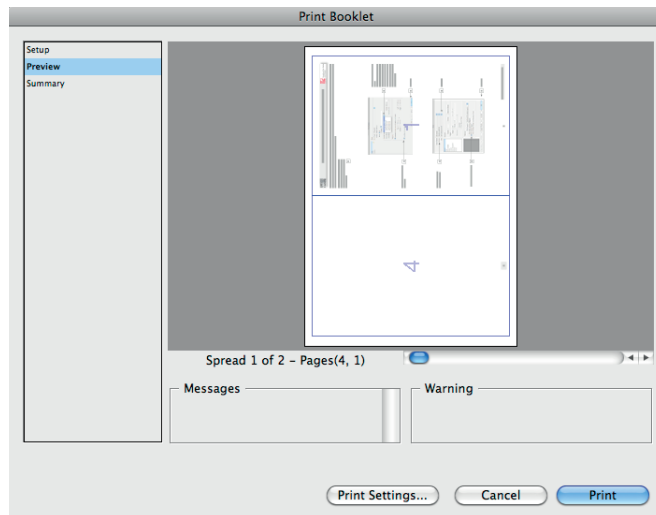

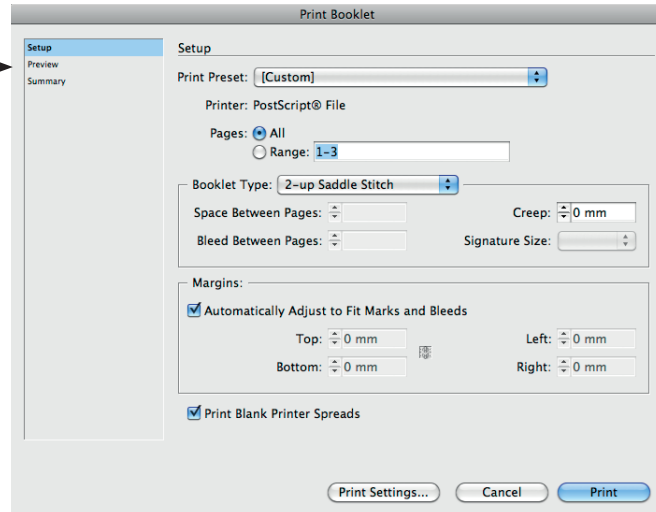

Make certain for the Bleed you tick Use Document Bleed Settings **14**

Click OK **15**

Choose Preview

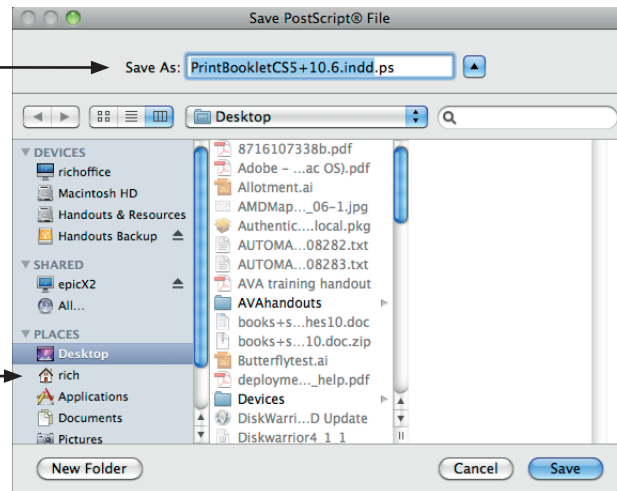

16

17 Click Print

Name your file

18

Navigate to your InDesign project folder in the dad homefolder

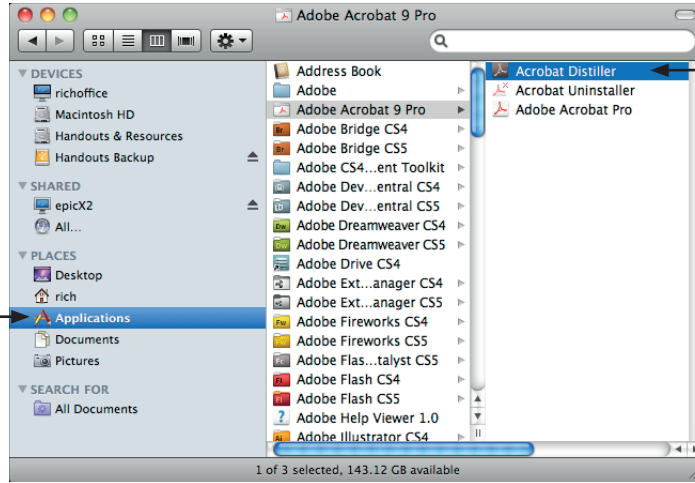

19

20 Click Save

Stage 3 Outputting a Postscript file using PrintBooklet

Go to Applications > Adobe Acrobat Pro > Acrobat Distiller

21

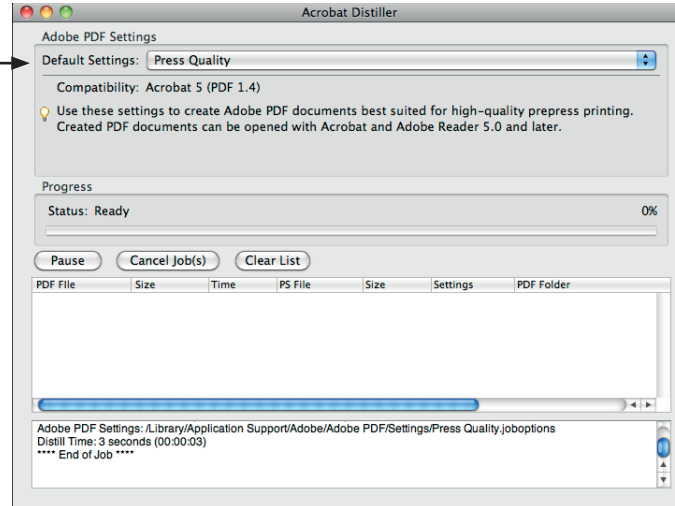

22

Double click to launch Distiller

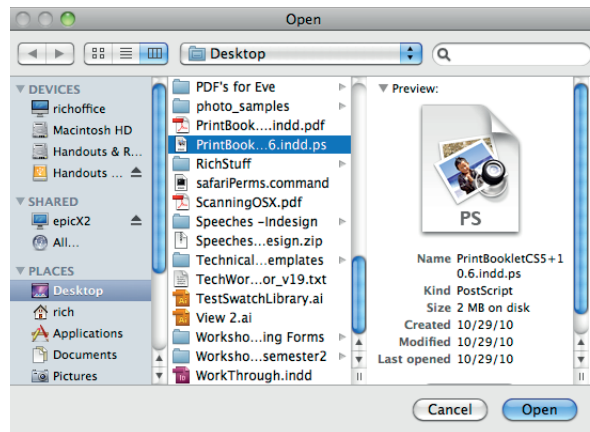

Choose Press Quality from the Default Settings menu

23

File > Open > navigate to your postscript file and select it

24

25

Click Open

Distiller will generate a PDF version of your document you can then open and check using Acrobat Pro or Acrobat Reader.
